

Mehdi Ali

MERN Stack + AI Engineer

mehdi035559@gmail.com | +92-312-7627983 | Lahore, Pakistan

GitHub: [mehdi-dev-code](#) | LinkedIn: [mehdi-ali-a33881296/](#)

Professional Summary

Full-Stack Developer and AI Engineer with hands-on experience building production-ready MERN stack applications and AI-powered systems. Proficient in React.js, Node.js, Express.js, and MongoDB for scalable full-stack development, alongside Python-based AI/ML tools including LangChain, FastAPI, Gemini API, and HuggingFace for RAG pipelines and LLM integrations. Built and deployed a Medical RAG System featuring document ingestion, vector search, and Gemini 2.5 Flash response generation. Experienced in RESTful APIs, JWT authentication, RBAC, real-time systems via Socket.io, and clean MVC architecture and ready to contribute to AI-embedded full-stack platforms from day one.

Technical Skills

MERN Stack, React.js, Node.js, Express.js, MongoDB, Mongoose, JavaScript (ES6+), Python, FastAPI, LangChain, Gemini API, FAISS, HuggingFace, RAG Pipelines, Vector Search, LLM Integration, JWT Authentication, RBAC, REST APIs, Socket.io, Git, GitHub, Postman, Tailwind CSS, Bootstrap

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Mobile-First Development
- Backend: Node.js, Express.js, RESTful APIs, Socket.io, JWT Authentication, RBAC, MVC Architecture, FastAPI
- AI & ML: Python, LangChain, Gemini API (2.5 Flash), FAISS, HuggingFace Embeddings, RAG Pipelines, Vector Search, Semantic Search, Scikit-learn, pandas, NumPy
- Database: MongoDB, Mongoose ODM, FAISS Vector Store, Data Modeling, Data Validation
- DevTools: Git, GitHub, Postman, API Testing & Debugging, Version Control

Experience

Full-Stack Developer Intern — Enigmatix, Bahawalpur, Pakistan

Feb 2025 – Jun 2025

- Contributed to full-stack web development projects using the MERN stack within a professional team environment, working across the full feature lifecycle from planning to deployment.
- Developed and maintained RESTful APIs with Node.js and Express.js, integrating them with React.js frontends to deliver functional, tested features.
- Collaborated on codebase improvements, bug fixes, and feature development across a 6-month internship tenure, participating in code reviews and version control workflows using Git.
- Gained hands-on experience with agile team workflows, debugging production issues, and writing maintainable, scalable code.

Projects

Medical RAG System — AI/LLM Application

2025

Python · LangChain · Google Gemini API (2.5 Flash) · FAISS · HuggingFace · FastAPI

- Built a production-grade RAG pipeline with document ingestion (TXT/PDF/CSV), local HuggingFace embeddings, FAISS vector store for semantic search, and Gemini 2.5 Flash for LLM response generation.
- Implemented multi-agent-ready modular architecture with conversation history tracking, response evaluation framework, and persistent FAISS vector store across sessions.
- Exposed the pipeline via a FastAPI service layer with clean API endpoints, demonstrating full AI backend integration capability.

AI Interview & Career Prep Platform — Full-Stack AI App

2025

React.js · Node.js · Express.js · MongoDB · Gemini API · Socket.io · JWT

- Built a full-stack AI-powered platform featuring Gemini API-driven resume analysis and a real-time Socket.io interview simulation engine.
- Implemented JWT authentication, secure multi-role access, and RESTful API architecture with persistent MongoDB storage.

ShopWave — Full-Stack E-Commerce Platform

2025

React.js · Node.js · Express.js · MongoDB · JWT · RBAC · Stripe · Multer · Tailwind CSS

- Engineered 20+ secured REST API endpoints with JWT middleware and role-based access control (RBAC), covering auth, product CRUD, order processing, and admin controls.
- Integrated Stripe webhook-based payment processing and Multer file uploads with server-side validation and persistent MongoDB storage.
- Built a fully responsive React frontend across 10+ views including dynamic cart, order tracking, user profiles, and a real-time admin dashboard.

Real-Time Chat Application — Final Year Project

2025

React.js · Node.js · Express.js · MongoDB · Socket.io · Zustand · DaisyUI

- Architected a real-time messaging system with Socket.io supporting one-to-one and group conversations with persistent MongoDB storage.
- Implemented Zustand state management and RESTful auth APIs delivering instant bidirectional updates across concurrent sessions.

Education

Bachelor of Science — Information Technology

Feb 2022 – Feb 2026

The Islamia University of Bahawalpur, Pakistan
